

City of Sparta

2012, 2013 2014, 2015 Street & Utility Improvements

CLIENT & LOCATION
City of Sparta, WI

PROJECT DESCRIPTION: In 2012, 2013, 2014 & 2015 the City of Sparta completed a number of improvements to their local street network. These improvements included new sanitary sewer, storm sewer, water main, new curb and gutter, sidewalks and street reconstruction.

CONTACT INFORMATION
Lynn Jerome, DPW
(608) 269-4340 x 228

The 2012 project included:

- Pearl Street (913 lineal feet)
- Oak Street, East Avenue & Tyler Street (total of 1,100 lineal feet)

PROJECT MANAGER
Gary Woolever

The improvements at Oak, East and Tyler included a redesign of the intersection to provide for a safer intersection for both vehicles and pedestrians. The intersection of Oak Street and Chester Avenue also included design of a rigid concrete intersection to allow for a heavy truck-turning radius.

The 2013 project included:

- Austin St (1,625 lineal feet)
- Brentwood Place (350 lineal feet)

The improvements at Austin Street and Brentwood Place were to improve stormwater drainage.

The 2014 project included:

- North Street (1,375 lineal feet)
- Pine Street (1,100 lineal feet)
- Main Street (750 lineal feet)

Main Street utilities are being relocated to allow for bridge reconstruction.

The 2015 project included:

- N. Water Street (1,450 lineal feet)
- Merrill and May Streets (1,055 lineal feet)
- Lincoln and Merrywood (905 lineal feet)
- S. Water Street (1,350 lineal feet)
