

Ronald McDonald House Expansion

IMAGE PROVIDED COURTESY OF RMHC-MADISON

LOCATION

Madison, WI

PROJECT SERVICES

- Civil Engineering
- Surveying
- Stormwater Management

Opened in 1993, the Ronald McDonald House of Madison has grown to serve more than 3,000 families annually. With a mission of serving the families of sick children, this facility is a cornerstone to providing the services, love and support that are so important to the healing process.

As the demand for services has increased, so has demand on the facility. An expansion of the existing facility will be completed in 2019. Vierbicher is honored to have provided professional services for this project in order to allow the Ronald McDonald House of Madison to serve even more families.

"Vierbicher has been a dedicated partner in the expansion of our Madison facility. With Vierbicher's assistance, we will be better able to help keep families with sick children close to each other, and provide the care and resources they need. Vierbicher donated their civil engineering and land surveying services, and for that we are truly grateful. Vierbicher understands the importance of helping others, serving their community, and demonstrates that daily through the way they do business."

-Kevin Huddleston, Executive Director, RMHC-Madison
