## CLIENT

Eppstein Uhen Architects (EUA)

## LOCATION

Middleton, WI

## PROJECT SERVICES

- Land Surveying
- Civil Engineering
- Site Development
- Landscape Architecture

Thanks in large part to the generous donations of alumni, Middleton High School is able to build a brand-new, state-of-the-art stadium complex, meticulously designed to propel our district's mission of fostering an inclusive, innovative, and inspiring environment for all students.

Research has consistently shown that students who actively participate in at least one of our diverse clubs, activities, or athletic programs significantly outperform their non-engaged peers in terms of academic success and grade point average.

The cutting-edge stadium is a testament to their commitment to providing even more opportunities for all students, unlocking their potential and empowering them to reach new heights in their educational journey.

Some of the new stadium improvements include:

- New, enlarged concession area.
- Dedicated coaches and trainer rooms
- New locker and team rooms next to the fields
- 30 new public toilet fixtures (1 family, 11 men's, and 18 women's toilets)
- New ticket booths for the stadium and a new ticket booth for baseball

Vierbicher is happy to work with this local community by providing Utilities, Grading, Drainage, Landscaping, Stormwater Management, and Erosion Control for this project.
